

Windows 10

# End of Life Assessment & Migration

With Windows 10 reaching end of life in October 2025, now is the time to future-proof your IT estate and reduce risk across your physical and virtual environments.

## The business challenge

Windows 10 reaches its End of Support on 14 October 2025. That means no more security updates, patches or compliance support, and increased exposure to cyber threats, software incompatibility, and regulatory risk.

So, what's next? Windows 11 isn't just a like-for-like upgrade. With new hardware requirements, configuration compatibility issues, licensing complexities, and potential

impacts on user experience, the migration brings a host of new challenges.

That's where Kerv comes in. We'll help you assess your current Windows 10 estate, map out your options, and deliver a structured migration path that minimises disruption and delivers long-term value.

## Why act now?

- ▶ Avoid being caught in a last-minute migration rush
- ▶ Mitigate critical security & compliance risks
- ▶ Prevent wasted spend on unsupported devices or services
- ▶ Ensure smooth user experience through proper planning and testing
- ▶ Opportunity to explore Microsoft Intune Windows 11 features

## Your outcomes

- ▶ A clear, actionable view of your current Windows 10 estate
- ▶ Strategic roadmap to migrate to Windows 11, AVD, or Citrix DaaS
- ▶ Review current endpoint management solution and explore Intune
- ▶ Visibility of risk, cost and timelines across your estate
- ▶ A fully managed migration or support where you need it most

# How it works

We tailor our assessment and migration approach to suit your business, which can include:

## Discovery & Readiness Assessment

- ▶ Device audit and compatibility checks
- ▶ Application mapping and risk analysis
- ▶ Security and compliance review

## Strategy & Planning

- ▶ Planning for hardware, AVD and/or Citrix DaaS Windows 11 upgrades
- ▶ Migration documentation pack and commercial review
- ▶ Stakeholder workshops and communication planning

## Training & Enablement

- ▶ End-user onboarding and adoption support
- ▶ Technical training for internal IT teams

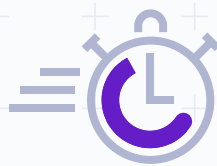

## Migration & Deployment

- ▶ Windows 11 build and deployment
- ▶ Application packaging & compatibility testing
- ▶ Phased rollout, including pilot groups

## Ongoing Support & Optimisation

- ▶ Post-migration health checks
- ▶ Support desk and issue resolution
- ▶ Continuous optimisation of new environment

## Let's get ahead of the deadline

Begin your migration with confidence. Work with a trusted Microsoft and Citrix Partner to deliver secure, efficient, and user-centric workspace solutions.

## Start your journey today
